March 16, 2020

At Speedy Sparkle Car Wash the health and well-being of our employees, customers, and communities is our top priority. With the continuing COVID-19 concerns, we wanted to be as responsive as possible to the needs of our customers and employees. It is important to note that a car wash can be one of the safer places to visit and do business during this time because it is in an outside environment with little potential for person to person interaction.

Starting March 16, 2020, we will be temporarily suspending all interior services, except full details in Loveland, to do our part to reduce the spread of COVID-19. We will still be offering a hand dry and tire shine at both locations and tips will still be accepted as our employees still enjoy the recognition and appreciation from customers. In Loveland, customers will be able to drive through the wash so they don't need to leave their vehicle. At our Louisville location we will still offer free, self-serve vacuums which will be disinfected every hour.

The following steps will occur hourly to ensure we provide a safe and clean facility for our customers and employees. These steps will be effective immediately at both locations.

- Disinfect all vacuums
- Disinfect all point of sale terminals
- Disinfect all countertops and door handles in the building
- Disinfect all restrooms

Speedy Sparkle will continue to serve the community while monitoring the situation and following the advice given by the Center for Disease Control and Prevention. Please continue to be vigilant with social distancing, washing your hands, avoiding touching your face and other hygiene practices suggested by the CDC, <https://www.cdc.gov/coronavirus/2019-nCoV/index.html>.
